No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                            1590.2

                        repeat_region
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          requests: clone request@eanger.ac.uk
On Jul 23, 2000 this sequence version replaced gi:8919366.
During sequence assembly data is compared from overlapping clones.
Where differences are found these are annotated as variations
together with a note of the overlapping clone name. Note that the
variation annotation may not be found in the sequence submission
corresponding to the overlapping clone, as we submit sequences with
only a small overlap as described above.
The following abbreviations are used to associate primary accession
numbers given in the feature table with their source databases:
Em: EMBL; Sw: SWISSPROT; Tr: TREMBL; Wp: WORMPEP; Information
on the WORMPEP database can be found at
http://www.sanger.ac.uk/Projects/C_elegans/wormpep This sequence
was generated from part of bacterial clone contigs of human
chromosome 20, constructed by the Sanger Centre Chromosome 20
This sequence is the entire insert of clone RP5-1005721 The true
left end of clone RP11-11720 is at 51899 in this sequence. This
sequence was finished as follows unless otherwise noted: all
regions were either double-stranded or sequenced with an alternate
chemistry or covered by high quality data (i.e., phred quality >=
30); an attempt was made to resolve all sequencing problems, such
assembly was confirmed by restriction digest. RP5-1005721 is from
the library RPCI-5 constructed by the group of Pieter de Jong. For
further details see
http://bcrac/home.htm
                                                                                                                                                                                                                                                                                                                                         _region
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            AL078633

The cDNA encodes the human histamine H3 receptor. The polypeptide contains the seven conserved hydrophoral comains and specific residues conserved in biogenic amine receptors. The human histamine H3 receptor polynucleotides and polypeptides are used in methods to screen for

Claim 2; Fig 1A-B; 54pp; English.

Novel human histamine H3 receptor polynucleotides and polypeptides used in methods to identify modulators of receptor activity.

Novel DNA molecules useful in gene therapy for the treatment inflammation or allergy, or for encoding a human histamine H3 and identifying histamine receptor modulators that are useful therapeutic and diagnostic agents. receptor

The present sequence represents the complete sequence of cDNA encoding a human histamine H3 receptor. The histamine H3 receptor DNA molecules are useful for isolating homologues of receptor, identifying and isolating genomic equivalents of receptor, and identifying, detecting or isolating mutant forms of the receptor. The DNA molecules are also useful in gene therapy for the treatment of inflammation or allergies. The human histamine H3 receptor protein is useful in identifying modulators of the human histamine H3 receptor, which in turn are useful as therapeutic and the standard of the human histamine H3 receptor, which in turn are useful as therapeutic and the standard of the human histamine H3 receptor, which in turn are useful as therapeutic and the standard of the st

CC histamine H3 receptor, a novel G-protein coupled receptor. The Clone was C isolated from a human thalamus CDNA library using a histamine H3 receptor CC probe. Histamine H3 receptor CDNA has been expressed in recombinant host C cells, which produced active recombinant protein. H3 receptor uccleic cells, which produced active recombinant protein. H3 receptor nucleic CC acids and proteins can be used to identify modulators of H3 receptor CC central nervous system disorders, such as depression, anxiety, psychoses (e.g. schizophrenia), tardive dyskinesia, Parkinson's disease, obesity, CC hypertension, Tourette's syndrome, sexual dysfunction, drug addiction, CC drug abuse, cognitive disorders, Alzheimer's disease, senile dementia, CC obsessive-compulsive behaviour, panic attacks, pain, social phobias, CC eating disorders and anorexia, cardiovascular and cerebrovascular CC disorders, non-insulin dependent diabetes mellitus, hyperglycaemia, CC constipation, arrhythmia, disorders of the neuroendocrine system, stress and spasticity, as well as acid secretion, ulcers, airway constriction, CC asthma, allergy, inflammation and prostate dysfunction. Histamine H3 CC receptor DNA molecules are also useful for isolating related sequences, CC identifying and isolating genomic equivalents, identifying, detecting or isolating mutant forms of DNA, and in gene therapy
                                                                                                                                                                                                                                                                                                     Query Match

New isolated antigenic peptides e.g., for G protein-coupled receptors (GPCR), useful for diagnosing and designing drugs for treating condit: in which GPCRs are involved, e.g. AIDS, Alzheimer's disease, cancer o diseases. conditions

Disclosure; Fig 1; 523pp; English.

The present invention describes antigenic peptides (I) comprising: (a) any one of 1601 sequences (see ABP82019 to ABP83619) of 12-24 amino acids. Also described: (I) an assay for the detection of a particular G protein-coupled receptor (GPCR) or a candidate polypeptide in a sample; and (2) an isolated antibody having high specificity and high affinity or avidity for a particular GPCR. (I) can be used as GPCR modulators and in gene therapy. The antigenic peptides for GPCRs are useful in detecting an antibody against a particular GPCR, and in the production of specific

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            CC antibodies. The peptides and antibodies are also useful for detecting the CC presence or absence of corresponding GPCRs. The antigenic peptides for CC GPCRs and antibodies are useful for diagnosing and designing drugs for treating immune-related diseases, growth-related diseases, cell C regeneration-related diseases, immunological-related cell proliferative CC diseases, outcommune diseases, e.g. ALDS, Alzheimer's disease, cell atherosclerosis, bacterial, fungal, protozoan or viral infections, costeoarchritis, osteoporosis, cancer, cardiomyopathy, chronic and acute cinflammation, allergies, Crohn's disease, disbetes, graft versus host consisty, depression, schizophrenia, dementia, mental retardation, memory CC loss, epilepsy, asthma, tuberculosis, obesity, nausea, hypertension, chypotension, renal disorders, rheumatoid arthritis, trauma, ulcers, or any other disorder in which GPCRs are involved. The antibodies may be used in immunoassays and immunodiagnosis. ABZ42523 to ABZ42869 encode CC exemplification of the present invention

The methods and compositions of the present invention are useful for diagnosing and treating human histamine H3 receptor-related disorders, such as central and peripheral nervous system disorders (depression, anxiety, psychoses, Parkinson's disease, Alzheimer's disease, dementia and tardive dyskinesia), asthma, allergy, disease mellitus, inflammation, immune, cardiovascular (hypertension, and arrhythmia) and gastrointestinal disorders. The present sequence is the coding sequence of the human
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Identifying agonists of recombinant human histamine H3 receptor protein activity, useful for diagnosing and treating H3 receptor-related disorders, such as nervous system disorders, asthma, allergy, hypertension and diabetes.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  WPI;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ద
                                                                          activity of the human histamine H3 receptor in response to ligand binding. The antibody is useful for detecting and quantifying expression of human histamine H3 receptors, which may be useful for diagnostic, epidemiological or forensic purposes. The antibody is potentially useful in treating diseases such as depression, anxiety, schizophrenia, parkinson's disease, obesity, hypertension, Tourette's syndrome, sexual dysfunction, drug addiction or drug abuse, cognitive disorders, historders disease, obsessive-compulsive behaviour, panic attacks, pain, eating disorders and anorexia, cardiovascular and cerebrovascular disorders, diabetes, constipation, arrhythmia, ulcers, asthma, allergy, inflammation, or prostate dysfunction. The present sequence is the full
                                                                                                                                                                                                                                                                                                                                                                                       The invention relates to a monospecific antibody immunologically reactive with a protein appearing as ADD22854, where the protein functions as a human histamine H3 receptor. The antibody blocks intracellular signaling
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   depression; anxiety; schizophrenia; Parkinson's disease; obesity; hypertension; Tourette's syndrome; sexual dysfunction; drug addiction; drug abuse; cognitive disorder; Alzheimer's disease; obsessive-compulsive behaviour; panic attack; pain; eating disorder; anorexia; cardiovascular disorder; cerebrovascular disorder; diabetes; constipation; arrhythmia; ulcer; asthma; allergy; inflammation;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 New antibody against human histamine H3 receptor, preferably with receptor antagonist activity, useful for diagnostic purposes and for treating diseases such as depression, Parkinson's disease, obesity
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Homo
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ADD22860;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ADD22860

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The present invention describes the use of polypeptides related to urological disorders for identifying a compound capable of treating a urological disorder, identifying a subject having a urological disorder, or treating a subject having a urological disorder. Also described: (1) a method for identifying a compound capable of treating a urological disorder; (2) a method for identifying a subject having a urological disorder; and (3) a method for treating a subject having a urological disorder. The compound has uropathic and cytostatic activities. The polypeptides related to urological disorders are useful for identifying a compound capable of treating a urological disorder, identifying a subject having a urological disorder. Disorders include urinary incontinence and benign prostatic hyperplasia. The present sequence encodes a human urological disorder related protein, which is used in the exemplification of the present invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Use of polypeptides related to urological disorders, e.g. 44390, 54181, 211 or for identifying a compound capable of treating a urological disorder or identifying and treating a subject having a urological
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence

                                                                                                                                                                                                                                                                                                                                                                                                                                                                  The present invention provides a human histamine H3 receptor protein and nucleic acid encoding such protein. The invention is useful for identifying compounds that modulate the activity of human histamine H3 receptor. The invention is useful for treating a condition that is mediated by a human histamine H3 receptor in a patient and for treating Parkinson's disease, obesity, Alzheimer's disease, pain, stress, ulcers, constipation and non-insulin dependent diabetes mediates. The present sequence is a human histamine H3 receptor cDNA.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    (LOVE/) LOVENBERG T

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                mACHR-6; muscarinic acetylcholine receptor 6; disorder; secretion; acetylcholine responsive cell; phosphatidylinositol turn-over; smooth muscle cell contraction; nervous system disorder; glandular; schizo-effective disorder; affective disorder; sleep disorder; movement disorder; eating disorder; drinking disorder; human; ss.
This invention describes the isolation of a novel human muscarinic acetylcholine receptor 6 (mACHR-6), capable of modulating the effect acetylcholine on acetylcholine responsive cells. mACHR-6 cDNAs and polypeptides may be used to detect naturally occurring mutations of mACHR-6 gene and determine if a subject with the mutated gene is at

```
This nucleotide sequence, the coding region of which is claimed, codes for a novel human 6 protein coupled receptor, termed filh495 (see CR ANY05122). The filh495 fragment (see also ANX59168) as probe. The clibrary using a rat filh495 fragment (see also ANX59168) as probe. The clibrary using a rat filh495 fragment (see also ANX59168) as probe. The clibrary using a rat filh495 fragment (see also ANX59168) as probe. The clibrary using a rat filh495 fragment (see also ANX59168) as probe. The clibrary using a rat filh495 polymucleotides of filh495 fragment (see also ANX59168) as probe. The clibrary using a rat filh495 polymucleotides of filh495 fragment (see also ANX59168) as probe. The clibrary using a rat filh495 polympetides and antibodies; and a method of cmodulating polymucleotide channel, expression vectors, host call; interact with a filh495 polympetides and antibodies; and a method of cmodulating polympetide channel or a potassium or calcium channel; (iv) modulate with a grotesion or another protein which naturally binds continued to filh495 polympetides; and a method of carnitine from a few continued continued to the continued to filh495 polympetide activities of a neuror ransmitter; e.g. acetylcholine or carnitine from a neuror ransmitter; e.g. acetylcholine or carnitine from a few continued to filh495 polympetide activity such as a revous system related disorders, e.g. ammesta, apraxia, agnosia, and continuences are cativity. The products can be used to treat: disorders mediated by abnormal filh495 polympetide activity such as nervous system related memory loss and learning disability; disorders affective disorders such as visual hallucinations, perceptual continuences or delerium associated with Lewy body dementia, schitzo-fifted products of percession, paradoxical shown selective disorders such as REM sleep; disorders affecting pain generation mechanisms e.g. pain related to irritable bowel syndrome, and selecting pain percention related continuence, oceophageal achalasia or chronic obstructive carbyca
